Subject

Alphanumeric terminals

New Alphanumeric terminals: Bigger and brighter, David Whieldon, Sept., p. 98

Alternative work schedules

Welcome to the night shift, Susan Foster, Feb., p. 88

Automation

Generators multiply output, David Kull, Jan., p. 122

CIO (Chief information officer)

CIOs—Executives to unlock technology's promise, John Rymer, Sept. 15, p. 134

Computer camps

Computer camps for your kids, Theresa Conlon, Apr., p. 152

Consultants

In-house consultants, Mary Miles, May, p. 106

Cost-cutting

The ten commandments of cost-cutting, David R. Roman, Sept., p. 128

Crisis

Surviving corporate crises, Martin Lasden, Jan., p. 84

Data communications

Common carriers: Focus on savings, John Seaman, Jan. p. 98

Controlling complex networks, John Seaman, Aug. p. 140

LANs ready to deliver, John Seaman, June, p. 134

Network reliability: How much do you need? John Seaman, Dec., p. 196

PABXs: Hitting the right buttons, John Seaman, Feb., p. 96

Data entry

Unrest in the data-entry department, Martin Lasden, May, p. 164

Data processing

The top 100 in dp, Lawrence Honig, June, p. G1

DBMS (Database management system)

DBMS: How sweet it is, Jan Snyders, Feb., p. 132

The little engine that can, David Ferris, May, p. 152

DDP (Distributed data processing)

Gearing up for ddp, Mary Miles, Apr., p. 128

Disaster

Before disaster strikes, Mary Miles, Sept. p. 136

DSS (Decision-support system)

Enriching the decision-making process, Martin Lasden, Nov., p. 244

Electronic mail

Should computers carry your mail? Part I: Electronic mail, David Kull, Nov., p. 164

Electronic typewriters

Electronic typewriters: Do they fit in? John Kirk, Feb., p. 180

Entrepreneurship

Flying solo, Martin Lasden, July, p. 104

Environment

Keep your computer comfortable, David Whieldon, July, p. 148

Expansion

Growing pains: When you have to expand, Jennifer E. Beaver, July, p. 88

Fault-tolerant systems

Fault-tolerant systems: Constant as the sun, Mel Mandell, Feb., p. 164

Forms

Computer forms: Five chances for more value, Donald Spencer, June, p. 186

Generators

Generators multiply output, David Kull, Jan., p. 122

Graphics

The new business graphics, Stanley Klein, July, p. 182

Hardware

When the boss picks the wrong hardware, Mel Mandell, Julia G. Brown, Jan., p. 76

Information

The information investment—How much is enough? Martin Lasden, Sept. 15, p. 82

Interview with John Naisbitt—The Megaman, David Kull, Sept., 15, p. 174

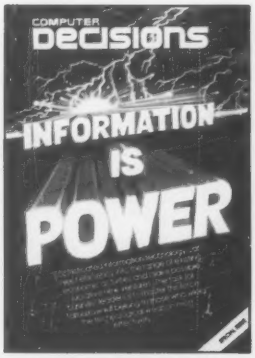
Promoting harmony—Part 1: Steering committees, David Whieldon, Sept. 15, p. 120

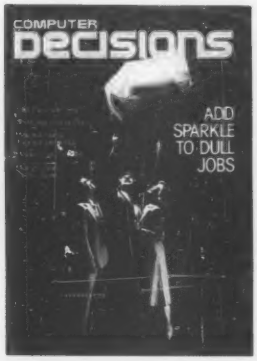
Promoting harmony—Part 2: Annual reports, David Whieldon, Sept. 15, p. 124

Promoting harmony—Part 3: Chargeback systems, Jan Snyders, Sept. 15, p. 128

Information centers

Information centers help users put it all together, David Kull, Feb., p. 70





Integrators

In search of the super integrator, Mary Miles, Aug., p. 86

Interactive terminals

Users rate interactive terminals, John J. Hunter, Nov., p. 202

Languages

Nonprocedural languages—Bringing up the 4th generation, David Kull, Dec., p. 154

Maintenance

Third-party maintenance: First-class service with a second-class name, David R. Roman, Dec., p. 164

Management

Do you really want to be a pioneer? David Whieldon, May, p. 122

Enriching the decision-making process, Martin Lasden, Nov., p. 244

Must career growth stop? Martin Lasden, Sept., p. 86

Put time on your side, Charles W. Mead, July, p. 172

Surviving corporate crises, Martin Lasden, Jan., p. 84

Unacceptable behavior: How much should you take? Martin Lasden, Feb., p. 78

Managers

How to pick your next employer, Martin Lasden, Aug., p. 74

Is the middle manager fading away? Martin Lasden, Dec., p. 140

MRP (Manufacturing resource planning)

MRP: The Industrial Revolution meets the Information Age, David Kull, Oct., p. 120

Mass storage

New lift for mass storage—Part I: More and more megabytes, David Whieldon, Dec., p. 172

New lift for mass storage—Part II: Software that shoehorns, W. Gary Parker, Dec., p. 189

Microcomputers

Executives who love their personal computers, David R. Roman, Jan., p. 142

In-house timesharing + micros, Howard Falk, May, p. 92

The little engine that can, David Ferris, May, p. 152

Networking micros . . . sharing resources, Susan Foster, Apr., p. 100

Supercharge your micros, Susan Foster, June, p. 116

Microprocessors

Powerful small systems, Susan Foster, Aug., p. 100

Micro software

Micro software: See what's in store, Susan Foster, Nov., p. 228

Microsystems

Micros—Harnessing the power, Susan Foster, Sept. 15, p. 152

Minicomputer systems

Where to get plug-compatible peripherals, Data Decisions, Jan., p. 161

Mistakes

Recovering from mistakes, David Kull, Apr., p. 144

Modems and Muxes

Multi-function modems and muxes, John Seaman, Oct., p. 188

Moonlighting

Moonlighting: A double standard? Martin Lasden, Mar., p. 82

Morale

Add sparkle to dull jobs, Martin Lasden, Oct., p. 136

Networking

Controlling complex networks, John Seaman, Aug., p. 140

Networking micros . . . sharing resources, Susan Foster, Apr., p. 100

Network reliability: How much do you need? John Seaman, Dec., p. 196

Office automation

Office automation: A revolution in search of a leader, Ara C. Trembly, June, p. 106

Office automation—Technology with a human touch, Sally E. Ketchum, Sept. 15, p. 162

Office automation: The gift of productivity, Jennifer E. Beaver, Dec., p. 149

Online systems

Fault-tolerant systems: Constant as the sun, Mel Mandell, Feb., p. 164

PCMs (Plug-compatible mainframes)

PCMs vs. IBM—The race for new technology, Elinor Gebremedhin, Dec., p. 212

Personal computers

Executives who love their personal computers, David R. Roman, Jan., p. 142

Plug-compatible peripherals

Where to get plug-compatible peripherals, Data Decisions, Jan. p. 161

Portable computers

Go-anywhere computing, Jennifer E. Beaver, Nov. p. 132

Power

Take charge of power problems, David Whieldon, Mar., p. 160

Printers

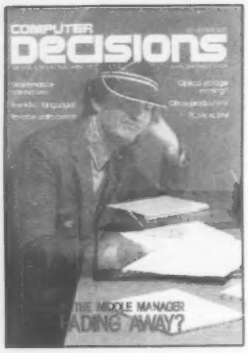
The latest in printers, David Whieldon, Aug., p. 118

Profits

The war for bigger profits—Part 1: The new competitive weapon, David R. Roman, Sept. 15, p. 30

The war for bigger profits—Part 2: Attacking new markets, Warren Kalbacker, Sept. 15, p. 42

INDEX TO 1983 ARTICLES



Programming

Generators multiply output, David Kull, Jan., p. 122

Project management

Sure-handed project management—Part I: Reducing the risks, Clayton Harrell Jr., Nov., p. 260

Sure-handed project management—Part II: Keeping track, R.L. Kliem, Nov., p. 260

Sure-handed project management—Part III: What the software can't do, Anthony J. Viscomi, Nov., p. 260

Recession

Salary survey—Part I: Does MIS/dp still deliver? David Whieldon, Feb., p. 116

Remote computing services

Remote computing services join your team, Jennifer E. Beaver, Sept., p. 120

Salaries

Salary survey—Part I: Does MIS/dp still deliver? David Whieldon, Feb., p. 116

Salary-Status survey—Part II: Cashing in on extras, David Whieldon, Mar., p. 94

Savings

Common carriers: Focus on savings, John Seaman, Jan., p. 98

SNA (Systems Network Architecture)

SNA: IBM wins again, Lawrence Stevens, Mar., p. 144

Software

Bumper harvest for DEC users, Mary Miles, Oct., p. 148

Executive support—Making molehills out of mountains, J. Rothfeder, Sept. 15, p. 66

Picking the right packages, Jan Snyders, July, p. 132

Software successes—Part I, Jan Snyders, Mar., p. 110

Software successes—Part II, Jan Snyders, Apr., p. 160

Software: What lies ahead? Jan Snyders, Nov., p. 212

Test drive your software, Thomas H. Berliner and Terry J. DeGarmo, Sept., p. 160

Strategy

Strategic planning—Information's role in the battle plan, David Kull, Sept. 15, p. 54

Supplies

Strengthening your supply lines, David R. Roman, Apr., p. 112

Telecommunications

Common carriers: Focus on savings, John Seaman, Jan., p. 98

PABXs: Hitting the right buttons, John Seaman, Feb., p. 96

Toward the global village—The new world of telecomm, J. Hillhouse, Sept. 15, p. 94

Timesharing

In-house timesharing + micros, Howard Falk, May, p. 92

Universities and technology

From these hallowed halls, David R. Roman, May, p. 136

Users

Keeping users happy, Robert Danielenko, Apr., p. 82

Vendors

The top 100 in dp, Lawrence M. Honig, June, p. G1

Voice mail

Should computers carry your mail? Part II: Voice mail, John Seaman, Nov., p. 164

Word processing

Word processing: It's never been easier, David R. Roman, June, p. 152

Word processors and terminals have something for everyone, Jennifer E. Beaver, Oct., p. 172

Title

A-D

Add sparkle to dull jobs, Martin Lasden, Oct., p. 136

Before disaster . . . , M. Miles, Sept., p. 136

Bumper harvest for DEC users, Mary Miles, Oct., p. 14

CIOs—Executives to unlock technology's promise, John Rymer, Sept. 15, p. 134

Common carriers: Focus on savings, John Seaman, Jan., p. 98

Computer camps for your kids, Theresa Conlon, Apr., p. 152

Computer forms: Five chances for more value, Donald Spencer, June, p. 186

Controlling complex networks, John Seaman, Aug., p. 140

DBMS: How . . . , J. Snyders, Feb., p. 132

Do you really want to be a pioneer? David Whieldon, May, p. 122

E-H

Electronic typewriters: Do they fit in? John Kirk, Feb., p. 180

Enriching the decision-making process, Martin Lasden, Nov., p. 244

Executive support—Making molehills out of mountains, J. Rothfeder, Sept. 15, p. 66

Coming next month

How to recruit successfully: How can you build a quality staff without spending a lot of time recruiting?

Database management systems roundtable: Top user experts tell how to get more out of your DBMS today and in the future.

Personal-computer peripherals, Part I—data-output devices: An exploration of the alternatives in printers, plotters, monitors, and special tools.

Salary survey, Part I: A sampling of 15,000 managers tells you how you're doing.

Managing your corporate pension portfolio on a personal computer: Here's how personal computers can help financial managers fine-tune corporate portfolios.

Are your systems growing obsolete? How to plan to avoid obsolescence.

The check is in the mail: Do "white lies" help managers get ahead, or are they a risky strategy that will leave you behind?

In February *Computer Decisions*.
